Analysis: Sundaram Asset Management

Fund Manager Comments

The Fund outperformed the reference index, the MSCI India Midcap TR Index, during the month. Key Contributors were Suzlon Energy (+31.3% due to stellar quarterly results led by wind turbine order book growth, healthy execution and increased cash position), CAMS (+26.1% as strong quarterly results indicate stable MF AUM-based revenue yields and rising share of non-MF RTA business), Torrent Power (+24.6% due to significant improvement in gas-fired power generation and higher spot prices charged from merchants) and Deepak Nitrite (+23.9% due to recovering phenol spreads and government's move to hike ammonium nitrate custom duty to 10%). Key Detractors were Supreme Industries and Schaeffler India (-10% each, following a sharp run-up in the stock prices over the recent months).

During the month, the Fund added ICICI Prudential Life Insurance (IPRU), Suzlon Energy and ACC Cement. IPRU, under new leadership, is witnessing a pickup in APE growth and strengthening its agency and direct digital channels to increase market share. Suzlon is benefiting from strong wind turbine order inflows and becoming a net cash company. ACC is India's 3rd largest cement manufacturer and well-positioned for long-term healthy volume growth, given its growth capex plans to double its capacity and master supply agreements with parent Ambuja and Sanghi. The fund exited REC given a sharp rally in the stock price. Weightings were increased in Marico, AU Small Finance Bank, BSE, Tube Investments and JK Cement while partial profits were also booked in Federal Bank, Fortis Healthcare, Biocon, Laurus Labs to fund other positions.

Economic data witnessed some sequential softening for the month. Manufacturing PMI fell to 58.1 (versus 58.3 in June) amidst smaller increases in new orders and output. Services PMI remains buoyant at 60.3 (versus 60.5 in June). Monthly GST collections were the third highest at INR 1.82 trillion, a growth of 10.3% yoy. However, two-wheeler sales surged by 17.2% yoy on the back of good monsoon rains while PV sales surged by 10.2% yoy driven by new model launches and attractive pricing. Power demand increased by 3.5% yoy as monsoons brought down temperatures while credit growth moderated to 14% yoy. On the policy front, the RBI has kept repo rates unchanged, and the newly formed NDA government presented its Union Budget for the full financial year 2024-25, focusing on youth employment, MSME credit schemes and tax adjustments. Foreign exchange reserves rose to USD 667 billion.

The June quarter results season was a mixed one for the Indian market. Overall aggregate revenues for 70% of companies reported in Nifty 100 grew by 11.8% yoy, while EBITDA and PAT grew by 10.7% and 9.9% yoy respectively. Sequentially, Revenue, EBITDA and PAT decelerated by 2.3%, 7% and 10.4% respectively.

Indian markets rose further in July, supported by robust inflows from foreign investors and domestic institutions. We remain positive on the long-term prospects of the Indian economy.

Fund as of July 31, 2024

Category as of June 30, 2024: India Equity funds investing principally in Indian companies. These funds invest at least 75% of total assets in equities; and invest at least 75% of equity assets in Indian equities

Price/projected earnings for a stock is the ratio of the company's most recent month-end share price to the company's estimated earnings per share (EPS) for the current fiscal year. If a third-party estimate for the current year EPS is not available, Morningstar will calculate an internal estimate based on the most recently reported EPS and average historical earnings growth rates. Price/projected earnings is one of the five value factors used to calculate the Morningstar Style Box. For portfolios, this data point is calculated by taking an asset-weighted average of the earnings yields (E/P) of all the stocks in the portfolio and then taking the reciprocal of the result.

The Long term earnings indicate the estimated earnings growth over the next 5 years.

NOTE**Temporary Restrictions on NRI/OCI/RI Investors**

With effect 09 February 2021 and until further notice, Sundaram India Midcap Fund ("SIMF") is observing the following temporary rules in order to comply with the new Securities and Exchange Board of India (SEBI) regulations. The rules apply to all Foreign Portfolio Investors (FPIs) such as SIMF, which invest into the Indian listed securities market, and are near the threshold of NRI/OCI/RI investors (see *definitions below) allowed in their funds.

- (i) **Subscriptions in SIMF from new and existing NRI/OCI/RI investors will not be allowed,**
- (ii) Existing NRI/OCI/RI investors will be allowed to redeem units in SIMF or switch into other Funds managed by Sundaram Asset Management Singapore Pte Ltd, where there are no restrictions on NRI/OCI/RI investments within the corpus of the relevant Fund(s);

For investors who do not fall within the NRI/OCI/RI definitions, SIMF continues to allow Subscriptions, Switches, Redemptions and Transfers as deemed appropriate to their investment needs.

*NRI: Citizens of India residing outside of India.

*OCI: Non-Indian Citizens who have been granted the status of OCI by the Government of India.

*RI: Citizens of India residing in India, i.e. generally tax residents in India.
